Jayesh Tanna

Senior Software Engineer I AI Platforms & Cloud Infrastructure

Hyderabad, India I tanna.jay90@gmail.com I github.com/jayesh-tanna I linkedin.com/in/jayesh-tanna

13+ years building distributed backend systems, cloud platforms, and production AI infrastructure. Hands-on C# and Python engineer, technical leader, and open-source contributor.

Experience

Microsoft, Azure AI Platform | Senior Software Engineer | June 2024 - present

- Led backend architecture and delivery of AskAI, Azure AI Foundry's customer-facing AI assistant. Public Preview in 12 months, deployed across 5+ production regions, with delivery coordination across six partner teams.
- Owned orchestration, LLM and tool integration, secure authentication, observability, tests, and offline and continuous LLM evaluation.
- Delivered agent-platform infrastructure, deployment pipelines, distributed tracing, and usage and tool-call monitoring.
- Designed and delivered Python fine-tuning SDK capabilities including DPO, RFT, and SFT. Contributed 40+ merged PRs across public Azure AI/ML Python SDKs.
- Lead two engineering teams, nine engineers total, through technical direction, code reviews, mentoring, and delivery ownership.

Microsoft, Azure DevDiv | Senior Software Engineer | January 2020 - June 2024

- Built shared infrastructure, backend services, and an onboarding portal for 15+ enterprise partners across 20+ production regions. Automated provisioning and regional deployments through infrastructure as code.
- Owned Kubernetes fleet lifecycle, capacity, autoscaling, tenant isolation, and staged production rollouts.
- Led zero-downtime partner migrations to shared infrastructure, reducing monthly infrastructure cost by 55% and SRE effort by 30%.
- Automated regional expansion, reducing partner onboarding from two weeks to one day.

Earlier experience

ACI Worldwide (2017 - 2020): C# payment-notification systems on AWS Lambda and SQS.
Tieto India (2015 - 2017): Full-stack engineering and background processing.
Solution Planets (2013 - 2015): Full-stack e-commerce development.

Skills

C#, .NET, Python, TypeScript, SQL, KQL, Kubernetes, Azure, AWS, Docker, IaC, Cosmos DB, PostgreSQL, Redis, distributed systems, MCP, RAG, fine-tuning, LLM evaluation, technical leadership.

Education & Public Work

Master of Computer Applications, Gujarat Technological University, 2013.
Microsoft DevBlogs: DPO Fine-tuning using Microsoft Foundry SDK.
